Streamlining IT Procurement

Automating Standard Laptop Orders with Flow Designer

Phase 3 – Service Catalog Trigger & Catalog Task Action

Individual Phase Technical Documentation

Project: IT Procurement Automation: Standard Laptop Fulfillment via Flow Designer

Platform: ServiceNow – Flow Designer, Service Catalog, Process Engine

Phase Focus: Configure the Service Catalog trigger and automatically create the fulfillment task with predefined values.

1. Phase Overview

This phase is derived from the uploaded project documentation and expands the original phase activities with additional implementation and validation notes. The original document defines the ServiceNow lifecycle as Request (REQ) → Requested Item (RITM) → Catalog Task (SCTASK).

2. Detailed Implementation Steps

Step 1: In Flow Designer, select + Add a trigger.

Step 2: Choose Application Triggers → Service Catalog.

Step 3: Select Service Catalog and confirm.

Step 4: Under Actions, choose + Add an Action, Flow Logic, or Subflow.

Step 5: Select Action → Create Catalog Task.

Step 6: Use Trigger → Service Catalog → Requested Item Record as the Requested Item data pill.

Step 7: Confirm target table is Catalog Task [sc_task].

Step 8: Set Short Description to “Laptop need to Configured”.

Step 9: Set Description to the approved configuration instruction.

Step 10: Set Assignment group to Hardware.

Step 11: Set Approval to Approved.

Step 12: Save, test with a suitable RITM, and activate after successful validation.

3. Additional Phase Notes

- The Requested Item data pill establishes the parent RITM relationship.
- Verify Hardware is an active group.
- Review Flow Execution Details after testing.
- Confirm the task is created only once.

4. Configuration / Validation Table

Action Field	Expected Value
Requested Item	Requested Item Record from Service Catalog trigger
Table	Catalog Task [sc_task]
Short Description	Laptop need to Configured
Description	Laptop need to Configured / approved configuration guidance
Assignment Group	Hardware
Approval	Approved

5. Phase Completion Criteria

- All implementation steps completed in the appropriate ServiceNow environment.
- Configuration/validation values match the expected output for this phase.
- Evidence or remarks are recorded for handover to the next phase.
