Streamlining IT Procurement

Automating Standard Laptop Orders with Flow Designer

Phase 4 – Service Catalog Item & Process Engine Binding

Individual Phase Technical Documentation

Project: IT Procurement Automation: Standard Laptop Fulfillment via Flow Designer

Platform: ServiceNow – Flow Designer, Service Catalog, Process Engine

Phase Focus: Connect the activated Flow Designer flow to the Standard Laptop catalog item and prevent conflicting legacy automation.

1. Phase Overview

This phase is derived from the uploaded project documentation and expands the original phase activities with additional implementation and validation notes. The original document defines the ServiceNow lifecycle as Request (REQ) → Requested Item (RITM) → Catalog Task (SCTASK).

2. Detailed Implementation Steps

Step 1: Open All → Service Catalog → Catalog Definitions → Maintain Items.

Step 2: Search for “Standard Laptop”.

Step 3: Open the catalog item.

Step 4: Locate the Process Engine section/tab.

Step 5: Review Workflow and Execution Plan fields.

Step 6: Clear legacy automation references when Flow Designer is intended to control the process.

Step 7: In the Flow field, select “Standard laptop task”.

Step 8: Save the catalog item.

Step 9: Document the configuration change.

3. Additional Phase Notes

- Legacy Workflow and Flow Designer together can create duplicate tasks or race conditions.
- Verify the selected flow is Active.
- Reopen the item and confirm the Flow field.
- Capture final configuration for audit/deployment.

4. Configuration / Validation Table

Configuration Check	Expected Result
Catalog Item	Standard Laptop
Process Engine → Flow	Standard laptop task

Configuration Check	Expected Result
Legacy Workflow	Cleared if not required
Execution Plan	Cleared if not required
Record	Saved successfully

5. Phase Completion Criteria

- All implementation steps completed in the appropriate ServiceNow environment.
- Configuration/validation values match the expected output for this phase.
- Evidence or remarks are recorded for handover to the next phase.

6. Documentation Record
