Streamlining IT Procurement

Automating Standard Laptop Orders with Flow Designer

Phase 5 – End-User Order Placement & Request Creation

Individual Phase Technical Documentation

Project: IT Procurement Automation: Standard Laptop Fulfillment via Flow Designer

Platform: ServiceNow – Flow Designer, Service Catalog, Process Engine

Phase Focus: Validate the requester-facing ordering process and confirm REQ/RITM creation.

1. Phase Overview

This phase is derived from the uploaded project documentation and expands the original phase activities with additional implementation and validation notes. The original document defines the ServiceNow lifecycle as Request (REQ) → Requested Item (RITM) → Catalog Task (SCTASK).

2. Detailed Implementation Steps

Step 1: Open All → Service Catalog.

Step 2: Open Hardware category.

Step 3: Locate Standard Laptop.

Step 4: Review specifications/options.

Step 5: Complete required variables and select Order Now.

Step 6: Confirm the generated Request Number.

Step 7: Open the Request record.

Step 8: Review Request stage and approval information.

Step 9: Open Requested Items and verify the Standard Laptop RITM.

Step 10: Confirm requested item information is retained.

3. Additional Phase Notes

- Use a controlled test requester during UAT.
- Record REQ and RITM numbers in test evidence.
- Verify the RITM is linked to Standard Laptop.
- Confirm the order has not skipped approval.

4. Configuration / Validation Table

Checkpoint	Expected Result
Catalog Category	Hardware
Catalog Item	Standard Laptop

Checkpoint	Expected Result
Request	REQ record created
Requested Item	Standard Laptop RITM created
Approval	Request enters configured approval stage
Traceability	REQ → RITM relationship available

5. Phase Completion Criteria

- All implementation steps completed in the appropriate ServiceNow environment.
- Configuration/validation values match the expected output for this phase.
- Evidence or remarks are recorded for handover to the next phase.

6. Documentation Record
